

Overview

The Area of Interest (AOI) Editor Tool within the Environmental Screening Tool (EST) Map Viewer allows a user to define and analyze an area anywhere in Florida to learn more about people, places, and natural resources at that location.

Quick Steps

1. **Create an AOI** – Navigate through the various pages to create a brand new AOI.

- *Name, Type, Description, Keep Until:* Name your AOI, select a type, enter a description (optional), and set a date at which the AOI will expire.
- *Features:* Draw points, lines, and/or polygons that represent your AOI. Once a feature has been completed and added to the map, it will display in a Features table within the AOI Editor Tool. Click on a row/feature in this table or click the feature on the map to display the editing options.
- *Analysis Areas:* If desired, group features together. Grouped features are analyzed together as a single analysis area and can contain multiple disconnected parts.
- *Results:* Access and view reports.

2. **Open an AOI** – Open a previously created/saved AOI.

- *Set criteria:* Refine the results that will be displayed.
- *Load:* Load and display the AOI on the map.
- *Results:* Access and view reports.

3. **Toggling Tools** – Hide or show the overall panel by clicking the arrow tab in the middle, right of the panel. Clicking on a blue header will expand or collapse a tool.

4. **Help** – Displays a variety of help topics such as navigation or search tips. Additionally, help videos and quick reference documents can be accessed in this section.
