

The following illustrates how the Agency Feedback Report may look on the Environmental Screening Tool.

Agency Feedback Report

Agency	United States Environmental Protection Agency (USEPA) <input type="button" value="v"/>	
Reporting Period	From: 01/30/06 <input type="button" value="calendar"/>	To: 09/30/06 <input type="button" value="calendar"/>

Purpose

The purpose of this performance report is to provide USEPA with feedback based upon the period of performance from January 30th, 2006 through September 30th, 2006. The information contained in this report is based upon the project reviews found in the Environmental Screening Tool (EST) by accessing the EST or by contacting the ETDM help desk at 850-414-5334. The identified opportunities and challenges are selected from a variety of sources including agency project reports, Annual Reports and/or any coordination and communication efforts where issues have been identified by the agency, the Federal Highway Administration (FHWA) and the Florida Department of Transportation (FDOT). Until the Performance Management System is operational, this report is based solely on projects that have been reviewed via the (EST).

Performance Results

Total Number of Projects Reviewed	30
Total Number of Comments Received	259

Compliance By Issue

Expected	414
Submitted	204

Total Number of Projects Reviewed by District

District 1	4
District 2	5
District 3	5
District 4	4
District 5	7
District 6	2
District 7	3

Total Number of Extensions Requested	N/A
Percentage of Participation during Review Period	79%
Percentage of Expected Comments received within 45 days	49%

Explanation of Percentage Rankings

The percentage of participation during the review period is calculated by dividing the total number of projects reviewed by the total number of project notifications received by the agency and multiplying by 100.

The percentage of expected comments received within 45 days is calculated by dividing the number of comments submitted on compliance issues divided by the number of expected comments on compliance issues and multiplying by 100.

Identified Opportunities and Challenges	
Issues	Action Items
(FDOT-USEPA Exhibit A) FDOT and USEPA experienced funding and invoicing discrepancies during the processing of invoices 3 through 6.	Due to the invoice discrepancies identified by FDOT and USEPA, the agencies consulted, agreed and developed an Exhibit A with the following terms and conditions that USEPA would absorb the overhead expense difference between 17% and 22% for invoices 3 through 6. Additionally, the agencies agreed that any differences that were identified on invoices 7 and 8 would be paid by FDOT. As a result of the discrepancies the agencies approved a time extension from March 30 th to June 30 th , 2006 in order to maintain services and resolve invoice discrepancies and complete close out procedures associated with the first generation funding agreement.
(FDOT Comptrollers Office) Timely Advance Pay request and Expenditure Reporting.	We have been requested by the FDOT Comptrollers Office to maintain timely Program and Project Reporting and Expenditure Reporting (including submittal of documentation for expenditures) in order for FDOT to seek federal reimbursement.
(USEPA Project Report) USEPA recommended that the Geographic Information System (GIS) analysis items for each issue be itemized.	The new GIS Analysis Report, available in December 2005, now lists the analysis items for each issue.
(USEPA Project Report) Several recommendations for modifications to the EST were discussed at the District 5 and District 2 ETAT meetings.	Recommendations for EST enhancements discussed at the District 5 and District 2 ETAT meetings have been added to the list of planned enhancements. These will be scheduled for future development based on priorities and available resources.
(USEPA Project Report) A few ETAT members mentioned they had a need for hands-on EST training.	FDOT provided opportunities for hands-on EST training during the Summer/Early Fall of 2006. These will continue to be scheduled annually.
(Agency Review Report) Based on compliance by issue the USEPA was expected to comment on 414; the USEPA submitted 204 comments. The participation rate identified in this report is based upon the issue by compliance identified in the Agency Review Report found in the EST. The division of the submitted comments by the expected comments yields the percentage of participation during the review period identified in this report.	FDOT will setup a teleconference with USEPA to identify and address any issues that have resulted in the 49% participation rate during the review period.

Detailed results of the agency project reviews are found in the Agency Review Report.

District	ETDM #	ALT #	Project Name	ETDM Phase	Issue	ETAT Member	Degree of Effect
