

## **Indirect and Cumulative Effects Task Group**

### **Objectives**

Identify how to accomplish Indirect and Cumulative Effects evaluations with the ETDM Process.

1. Determine standard analyses to support evaluations.
2. Define area of analysis for each resource.
3. Determine “off system” analyses.
4. Define what gets accomplished in Planning Screen and Programming Screens.
5. Identify data sets needed for evaluations.
6. Identify supporting data sets on the EST.
7. Prioritize data needs for Indirect and Cumulative evaluations.
8. Determine if the existing comment screens in the EST should be modified.
9. Define expected graphic or tabular output for each analysis.
10. Define functional revisions to the EST.
11. Determine responsibility for Indirect and Cumulative Effects evaluations.
12. Identify how to engage local governments involving land use decisions in considering Indirect and Cumulative Effects during the local planning process.
